

Burroughs

B 1000 Series SMCS

Reference Card

(Relative to SMCS 10.0.007)

ATTACH

Attaches a station to a program or remote file.

Controller and system ODT syntax:

BROADCAST

Sends a message to all logged-on stations.

Syntax:

BYE

Logs the user off the SMCS program.

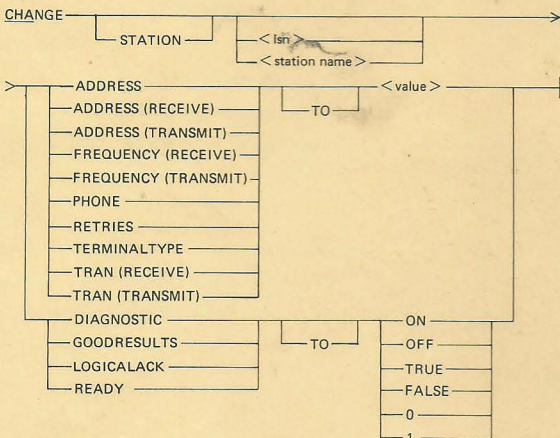

Workstation, remote ODT, and controller syntax:

CHANGE

Changes various station attributes.

Controller and system ODT syntax:

CLEAR

Clears a remote file.

Controller and system ODT syntax:

CLOSE Command

Closes the JOBS file.

Controller and system ODT syntax:

CONTINUE Command

Causes a step macro procedure to resume.

Workstation, remote ODT, and controller syntax:

DETACH

Detaches a station from a program or remote file.

Controller and system ODT syntax:

DUMP

Causes an SMCS program dump to be created.

Controller and system ODT syntax:

DYNAMIC

Controls the method by which stations are marked off-line.

System ODT syntax:

FILE

Provides information on a file.

Syntax:

HARDWARE

Specifies the recordsize of the TRACE file.

System ODT syntax:

HELP

Provides a list of all valid commands for the station.

Syntax:

HELP _____|

ID

Assigns an identifier to the station.

Workstation, remote ODT, and controller syntax:

ID < identifier > _____|
| _____|
| < command string > _____|
| [< macro procedure >] _____|

INITIATE

Initiates a program in the JOBS file at the system ODT.

System ODT syntax:

INITIATE < program-id > _____|

JOBS

Returns information on jobs in the mix.

Workstation, remote ODT, and controller syntax:

JOBS _____|

LOGON

Adds, changes, deletes, or lists the default log-on command.

Workstation, remote ODT, and controller syntax:

LOGON _____|
| ADD _____|
| CHANGE _____|
| DELETED _____|
| LIST _____|
| _____|
| < logon command > _____|
| [< macro procedure >] _____|

MACRO

Adds, changes, deletes, or lists macro procedures.

Controller syntax:

MACRO _____|
| ADD _____|
| CHANGE _____|
| DELETED < macro name > _____|
| LIST _____|
| ON _____|
| _____|
| < macro name > _____|
| < macro text > _____|

Workstation and remote ODT syntax:

MACRO _____|
| ADD _____|
| CHANGE _____|
| DELETED < macro name > _____|
| LIST _____|
| _____|
| < macro name > _____|
| < macro text > _____|

System ODT syntax:

MACRO ON _____|

MAIL

Writes messages to the MAIL file.

Syntax:

MAIL _____|
| _____|
| < identifier > _____|
| < message string > _____|

MAKE

Changes certain station attributes.

Workstation and remote ODT syntax:

MAKE _____|
| _____|
| NOT _____|
| SIGNAL < character > _____|
| SCROLL REVERSE _____|

Controller syntax:

MAKE _____|
| _____|
| STATION _____|
| _____|
| < lsn > _____|
| < station name > _____|
| NOT _____|
| READY _____|
| CON _____|
| SIGNAL < character > _____|
| SCROLL REVERSE _____|
| NOT _____|

System ODT syntax:

MAKE _____|
| _____|
| STATION _____|
| _____|
| < lsn > _____|
| < station name > _____|
| NOT _____|
| READY _____|
| CON _____|
| ODT _____|

MOVE

Reroutes messages from one station to another station.

Controller and system ODT syntax:

MOVE _____|
| _____|
| < number > _____|
| ALL _____|
| ONE _____|
| FROM _____|
| STATION _____|
| _____|
| < lsn > _____|
| < station name > _____|
| TO _____|
| STATION _____|
| _____|
| < dest lsn > _____|
| < dest name > _____|

NEWS

Displays or changes the news message.

Workstation and controller syntax:

NEWS _____|

Remote ODT and system ODT syntax:

NEWS _____|
| _____|
| < news message > _____|

PASS

Requests a function of a program without signing on to the program.

Workstation, remote ODT, and controller syntax:

PASS < program-id > < data string > _____|

PASSWORD

Sets or resets the COBOL74 password.

System ODT syntax:

PASSWORD _____|
| _____|
| < password > _____|

READY

Makes a station ready.

Syntax:

READY _____|
| _____|
| < lsn > _____|
| < station name > _____|

To obtain a color XREF
* EX COBOL/XREF FILE CARD NAME (USERID) / PROGRAM NAME PH2-DX-02

REMOVE

Removes messages from a station.

Controller and system ODT syntax:

REPORT

Displays information on the status of a station or stations.

Syntax:

SEND

Sends a message to the specified stations.

Syntax:

SIGN OFF

Detaches a user from a program.

Workstation, remote ODT, and controller syntax:

SIGN ON

Attaches a user to the specified program.

Workstation, remote ODT, and controller syntax:

SIGNAL

Changes the SMCS signal character for all stations.

Controller and system ODT syntax:

STATUS

Displays the current status of a station, program, or remote file.

Syntax:

STOP

Terminates the SMCS program in an orderly manner.

System ODT syntax:

SYSTEM

Displays information on the SMCS version, translate option, and system Hostname, and changes the translate option.

Workstation syntax:

Remote ODT and system ODT syntax:

TABS

Sets the tab stops on a terminal.

Syntax:

TERMINATE

Terminates a step macro procedure.

Workstation, remote ODT, and controller syntax:

TRACE

Invokes the SMCS tracing facilities.

Controller and system ODT syntax:

TRANSLATE

Sets or resets the translate option for a station.

Workstation, remote ODT, and controller syntax:

USER

Logs a user on to the SMCS program.

Workstation, remote ODT, and controller syntax:

ZIP

Spawns an unsecured MCP control string.

Remote ODT syntax:

? <MCP control instruction >

Spawns a secured MCP control string.

Workstation, remote ODT, and controller syntax:
