

*Patented
Backup
for Your
IBM Disk*

**LOW-COST, FAST PROTECTION FOR
ALL YOUR VALUABLE RECORDS**

Patented, proven technology now lets you protect valuable information on your IBM PC and XT fixed disks quickly and inexpensively. The Corvus MIRROR offers backup from the IBM fixed disk to video tape that's reliable, convenient and secure.

The MIRROR safeguards all your important transactions and records—sales figures, inventories, key accounts, payroll records, tax returns—virtually every fact that's critical to your company's daily operations.

The MIRROR is simply great insurance. For \$495 you can buy the MIRROR and peace of mind.

The MIRROR lets you back up and restore up to 91 megabytes of valuable business information on a single two-hour video tape cartridge. That's enough information to fill nine 10-megabyte IBM drives.

The MIRROR is simple to install and use. The MIRROR card plugs directly into a peripheral slot on your IBM PC or XT. A standard audio/video patch cord connects the card to a low-cost video cassette recorder either in the VHS or beta format. At a push of a button, you back up information on video

cassette tape or restore information to your disk. Convenient, removable cassettes even let you store your backup information in a safe place.

Best of all, MIRROR has proven reliability. More than 10,000 micromputer owners now enjoy the security that the MIRROR provides.

The MIRROR: Patented, low-cost technology you can rely on.
