

INTRODUCTION

The Software Terms and Conditions list includes all types of programs currently marketed by NAD and NMD. Only terms and conditions currently marketed to commercial customers are included.

ORGANIZATION

The list is presented in program number sequence. A single line entry contains all information for a machine type and features unless terms and conditions vary for a program and its feature. Footnotes are kept to minimum and, when practical, a single footnote is used for a data field. A hyphen indicates that a data field does not apply or no longer is available. Other special codes used will be explained in the legend.

LEGEND FOR SOFTWARE TERMS AND CONDITIONS

Column Heading	Explanation
PROGRAM NUMBER	Self explanatory.
TP	Indicates the testing period allowed (in months) for the basic license.
WT	Denotes whether the program is warranted or not. Y = Yes
SC	The Service Class designation, if any, for a program.
IL	Tells if Installation or Location License applies. I = Installation license applies L = Location license applies
PROGRAM SERVICES CS Until	Central Service (CS) information is detailed in this area: nn/nn/nn = The date when Service will no longer be furnished by IBM. Notice+nM = Service will be available for the specified number (n) of months (M) after IBM issues written notice of discontinuance.
PROGRAM SERVICES LS/LA Until	Local Service (LS) and Local Assistance (LA) information is detailed in this area: nn/nn/nn = The date when Local Service or Assistance will no longer be furnished without charge. Notice+nM = Local Service/ Assistance will be available for the specified number (n) of months (M) after IBM issues written notice of discontinuance. Ship+nM = Local Service/ Assistance will be available for the specified number (n) of months (M) after shipment.
AVAIL	Either "Now", if available, or the planned date of availability.
OPERATING ENVIRONMENT	The program's operating environment(s), either a system or software, as applicable.
OTHER	Other terms and conditions which may apply to the program, such as DSLO (D) or Volume Licensing (V). An @ symbol indicates that this program was announced before July 6, 1976, and that only one license is required for programs being operated on directly cable-connected multi-CPU configurations controlled by ASP or JES3 when operated in ASP/JES3 mode.
